

pBAT expression vectors

Feature table

Feature	Position in pBAT4
T7 promoter	1 - 17
lac operator	21 - 42
T7 gene 10 RBS	50 - 80
Polylinker	83-152
SP6 promoter	157-175
T7 transcriptional terminator	254-295
lacI gene (coding region)	705-1786
b-lactamase gene (coding region)	2556-3406
origin of replication	3481-4176
Total length	4416

References:

Reference for these original non-fusion vectors is:

J., Rikkonen M., Hyvönen M., Kääriäinen L. (1996)

T7 vectors with modified T7/lac promoter for expression of proteins in *Escherichia coli*. Anal. Biochem., 236:371-373
